

Sustainability in Steel Construction
ES CHARTER MEMBER

ASI Environmental Sustainability Charter

Certificate of Membership

awarded to

KMS Engineering Group Pty Ltd

Validity: 1 November 2018 to 30 June 2019

As an ASI Environmental Sustainability Charter (ESC) Certified Company **KMS Engineering Group Pty Ltd** commits to run their business along sustainable lines, demonstrate environmental responsibility and share their knowledge of sustainability with others, as will be demonstrated by:

- Developing and promoting steel as an environmentally sustainable form of construction.
- Operating so as to optimize the eco-efficiency of steel manufacturing, processing, treatment and construction throughout the full product life cycle.
- Embracing the environmental hierarchy of reduce, reuse and recycle so as to minimise impacts on resources and energy, in steel manufacturing, processing, treatment and construction.
- Continuing to build environmental awareness and sharing this knowledge with suppliers and subcontractors so as to encourage the full supply chain to embrace and implement sustainable policies.
- Engaging with the local community on environmental issues as appropriate.
- Showing commitment to the ESC by updating the Environmental Management System (EMS) Mentor as appropriate and completing a progress audit once a year with the ESC nominated auditor.
